specification grade low voltage exterior lighting components

## PRACTICAL MEETS SOPHISTICATION

FX introduces a fresh approach to pathlighting: the GuscioTartaruga.

Unlike any other pathlite, the GT is specially designed to make it adaptable to a wide range of lighting needs. With its flexibility in adjustment to any angle, your favorite path, plant or flower will not be left in the dark. Designed with the user in mind, its aim is to highlight what YOU want – not what your lighting fixture wants.

# flex

## FULLY CUSTOMIZABLE

Pivot the GT down to illuminate desirable features directly below, angle it up to highlight a subject further away, or choose any angle in between for any object in between! Its flexibility is infinite. Perfect for illuminating steps, flower beds or even backyard golf putting greens.
