

*The AP is the sister fixture to our SP path light, with a similar shape, but resized in petite proportions. While the SP has a stylish brass top, the AP incorporates an all-copper top and smooth finish. This luminaire is milled from extra-heavy gauge copper and solid brass, engineered to last. The AP is sized right for use in planters or when the design calls for an understated fixture.*

## AP: Path Light

### *Concealed Illumination*

This sleek and sophisticated micro luminaire offers subtle yet effective path lighting. The small scale of the copper AP can camouflage well into any garden landscape.

Because the AP is precisely machined from solid copper, it will last for decades even at the ocean's edge.

# AP: Path Light

**FACTORY INSTALLED OPTIONS:** Order 1 + 2 + 3 + 4
