

The CG is an unobtrusive specification-grade wall light that provides glare-free illumination. This 12V unit is a perfect choice for high traffic public areas near water such as resort applications. An innovative adjustable lamp mount allows the installer to fine tune beam projection to suit project needs. Solid brass and composite construction make this fixture a lasting value.

Timeless Beauty

We've chosen to use brass and copper in our fixtures for their high strength and corrosion resistance. These materials have stood the test of time, and impart a natural beauty that can't compare to other types of finishes.
