

*Similar to the DL in size and shape, the AN has a smooth, all copper top and finish, while the DL has a stylish brass top. Milled from extra heavy gauge copper and brass, this petite luminaire is engineered to last. This model is perfect for coastal exposures or areas where irrigation water contains high levels of minerals or caustic salts.*

## AN: Path Light

### *The Timeless Beauty of Copper*

The appeal of a copper finish lies in its organic quality and natural mottled earthtones that develop over time. Although we ship the copper path lights in a bright condition, they will quickly transform to a penny brown (moss-green brown or a blue-green patina by the ocean).
