

What's New 2022

FXLuminaire®

New Products, Training, and Tools to Grow Your Business

Check out the latest additions to our professional solutions lineup and see what's coming down the pipeline in 2022.

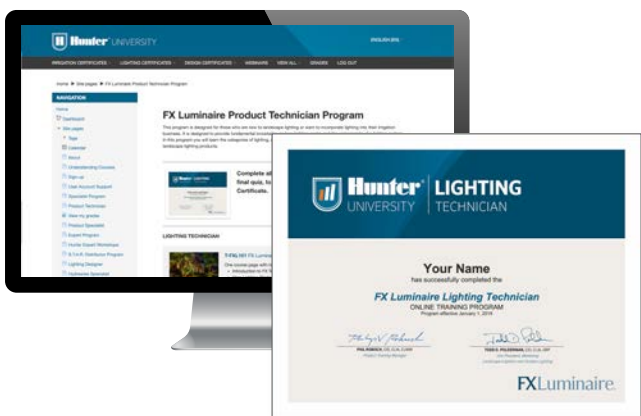

Work Smarter with My Design
All you need is a free account to get started!

MY DESIGN

Designers and contractors can leverage the new My Design tool to simplify the lighting design process, impress their customers, and close sales faster — no technical expertise required! Check out the time-saving benefits of My Design:

- Users snap pictures while walking the jobsite, then drag and drop desired products over the image
- Complete product lists can be shared with a local distributor via email from within the tool
- Printable PDF sell sheet can be emailed to customers

LIGHTING TECHNICIAN PROGRAM

This self-paced online training program from Hunter University provides the foundational knowledge you need to succeed in landscape lighting. The 10-course certificate program covers:

- The premium features offered by FX Luminaire lighting fixtures, controllers, and accessories
- The basic components of a lighting system and how they bring outdoor living spaces to life
- Installation methods, design strategies, and tips for growing your business with FX Luminaire

BUILDING YOUR LIGHTING BUSINESS

We developed this comprehensive, free training manual to help contractors feel confident about adding landscape lighting solutions from FX Luminaire to their offerings. The guide presents:

- Essential lighting concepts, design techniques, and customer engagement strategies
- The history, science, art, and business of successful lighting design
- The key benefits of FX Luminaire fixtures and lighting control solutions

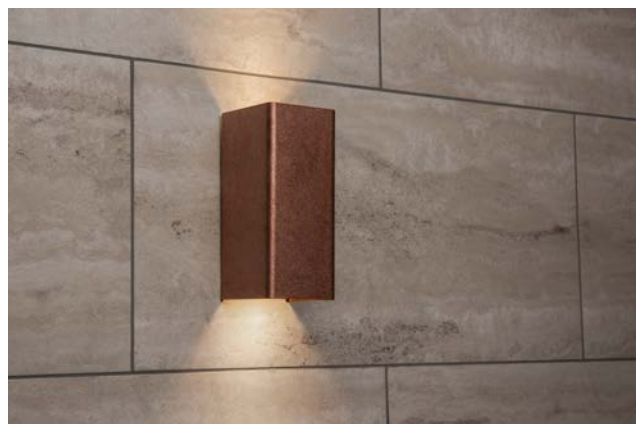

SRP STRIP LIGHT

The SRP Strip Light comes with all components needed for installation — with no adhesive or heat shrink required! The SRP ensures a seamless, long-lasting installation with:

- An extruded silicone body that reduces hot spots
- 3.1 m or 12.2 m lengths with 51 mm cutmarks for precision customisation
- An optional aluminium channel mount for easier installation in hardscape settings

NL WALL SCONCE

The bidirectional NL Wall Sconce bridges the gap between indoor and outdoor lighting applications. Check out the key benefits provided by this versatile fixture:

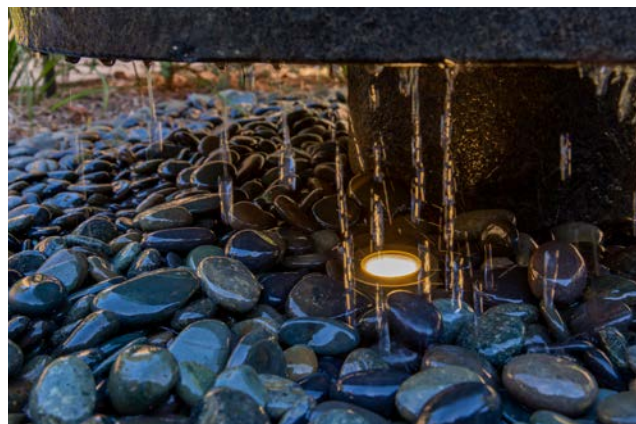

- At just 81 mm wide, it's ideal for wooden posts, rafters, metal beams, and stone columns
- Provides ambient lighting, framing, transition points, perimeter lighting, and accenting
- Compatible with Luxor™ Technology for zoning, dimming, and colour, with separate control of the up and down configurations

HS RECESSED WALL LIGHT

The minimalist, low-profile HS Recessed Wall Light provides a practical and innovative solution for modern lighting applications. The compact fixture:

- Easily accommodates the shorter steps of contemporary hardscapes.
- Provides a next-generation alternative to traditional area lights due to its outward, floor-grazing light distribution capabilities
- Is ideal for illuminating walkways, driveways, lawns, and patios

LP UNDERWATER LIGHT

The versatile LP Underwater Light is available with a new vertical (VR) lead wire configuration in addition to its original horizontal (HZ) orientation. The vertical option makes it easier to place the fixture:

- Directly into a wall
- At the bottom of a golf cup
- In a 64 mm PVC schedule 40 conduit
- In ponds, fountains, and other water features

LUXOR CLOUD CONTROL

With Luxor Cloud Control, bringing nighttime living spaces to life is easier and more convenient than ever before. Cloud-based management:

- Eliminates local network limitations to streamline control
- Enables remote site management from anywhere in the world with an internet connection
- Provides time-saving off-site system control, secure cloud access, and custom site management
- Integrates fully with leading smart home technologies from Control4, Crestron, ELAN, Lutron, and Savant

LINE-VOLTAGE SERIES

The Line-Voltage Series provides maximum light output and seamless aesthetics for state-of-the-art illumination in any environment. The series offers:

- Ultimate flexibility for desired control, colour temperature, and optics, with outputs up to 2,500 lumens
- The ability to wire fixtures into the main electrical system with no special transformer required
- World-class engineering, modern designs, and tamper-resistant features for total security in public spaces
- Easy serviceability with removeable lighting cartridges and various locking mechanisms

THE VAULT

Unlock The Vault beginning in January 2022 to learn about FX Luminaire products, engage in challenges, answer weekly trivia questions, and earn coins to win prizes. Inside The Vault, you can:

- Take advantage of exclusive opportunities to increase your skills and test your knowledge
- Earn bonus coins by participating in select training events, organising demos, and offering special product promotions
- Access valuable resources to help grow your business
